

# Company Profile

2025

Your trusted Italian distributor. A reliable partner for scientific research

## Our Company

In 2006, Aurogene was founded by Antonio Petrone, who for ten years worked as a researcher at La Sapienza University of Rome, in the field of Genetics of Autoimmune Diseases. Aurogene is a distribution company, of reagents, instrumentation and consumables for research and diagnostic laboratories. The direct employees, from the technical sales department, have a scientific background and are able to interact professionally with target customers. After a period as a sole proprietorship, Aurogene S.r.l. was officially founded in 2010 and operates throughout the country through a sales network consisting of direct employees, agencies and sub-distributors.

## Values

Aurogene S.r.l. operates in the Life Science sector, specifically dealing with the distribution, on the Italian territory, of reagents and instruments for scientific laboratory research. We believe in teamwork, that's why our goal, as a qualified, serious and reliable partner, is to support and flank the customer, accompanying him throughout the process of choosing the product. This is through a process of updating, informing and acquiring the research instruments on the market.

## Service

Thanks to our wide range of services, we can support your research needs. Moreover, you can be supported throughout your project by our partner laboratories, which are GMP and ISO certified.

Our best services

Next Generation Sequencing (NGS)

ELISA

CRISPR/Cas9

Interactomics

Proteomics

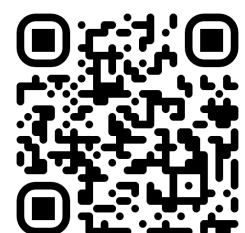

Antibodies production

# Partners

Our partnerships are an added value and enable us to fully meet all customer needs. From 2006 to the present, Aurogene S.r.l. has introduced several major brands into its business portfolio.

In particular companies dealing with: Molecular biology, Cellular biology, Dedicated instrumentation. For this reason, the need arose to introduce technical figures to support the sales network and able to ensure adequate after-sales service as well. Particularly in the area of scientific instrumentation, a dedicated field service office was recently introduced.
